

**YOUR
MARKET LEADER FOR
AGV SERVICES**

The ProLog Automation logo, identical to the one in the top left corner, is centered within a dark green diamond-shaped overlay. The background of the entire page is a 3D rendering of a warehouse floor with several yellow and grey AGVs (Automated Guided Vehicles) moving along marked paths. The AGVs are carrying yellow boxes with various handling symbols like "fragile" and "upside down".

**Contact us if you
need support as an
AGV manufacturer.**

AGV MANUFACTURERS

We help manufacturers of automated guided vehicles with their AGV project according to their wishes:

SERVICES

Mounting / Calibration

You get precise mounting and careful measurement of the navigation features

Simulation

Your existing AGV system or your new concept with a comprehensible analysis for optimised implementation.

Commissioning

Your driving course and your vehicles of all common control systems will be professionally put into operation.

Installation of AGV peripherals

You get a clean and on-time installation of the peripheral AGV facilities.

Maintenance / UVV inspection

You get professional maintenance and safety inspections of your AGV systems.

Start-up support / Plant operation

You benefit from our function as an intersection between operator and plant manufacturer.

Hotline

You will be represented and supported by us to serve your customers as quickly as possible and ensure qualified support by phone or on site.
